IPC Code: G06F 19/00; G06F 13/00;
Priority Number: 1996-09-27 JP1996000256039
Abstract:

PROBLEM TO BE SOLVED: To efficiently perform registration and management of a work flow and maintenance of a process operating the work flow.

SOLUTION: A process table 900 where the sequence of works or document circulation is divided into plural partial processes and work flow definition information is registered for each partial process and a process management table 1000 where management information of the whole of partial processes is stored are provided. At the time of operation, sequence information of a partial process to which an item will be next transferred or the like is recorded in an item management table 1100, where the flow sequence of the item, progress information, etc., are recorded, at each time of transfer of the item between partial processes constituting the process. Information of items which stop the operation and wait for restart is stored in a stop item table 1200 with respect to each partial process.
